Customer Value

- Collect every patient's data less than 10 minutes
- Ideal smile design & optimal teeth positions
- Consultation & Treatment planning
- Prosthetic design with aesthetic & occlusion

Providing digital standard for dental prosthesis.

R2STUDIO and Digital Oral Design provide a complete digital solution from patient data acquisition, digital face-bow, digital mounting, virtual wax-up and occlusion design functions for complex full mouth and aesthetical prosthesis.

Collect every patient's data less than 10 minutes for complex full mouth case prosthesis

Send the data to R2 Center and receive **feedbacks** for ideal smile design & optimal teeth positions **in 24 hours**.

Using above result, **evaluate patient's esthetics, functional problems,** and offer alternatives to patient.

Based on the Mx.anterior teeth position obtained from the Digital Oral Design, an **ideal esthetics and occlusal virtual wax-up** can be made.

This is the most complex part of the full mouth prosthesis process. Based on the results, **full mouth prosthetics with ideal esthetics and function can be performed predictably.**

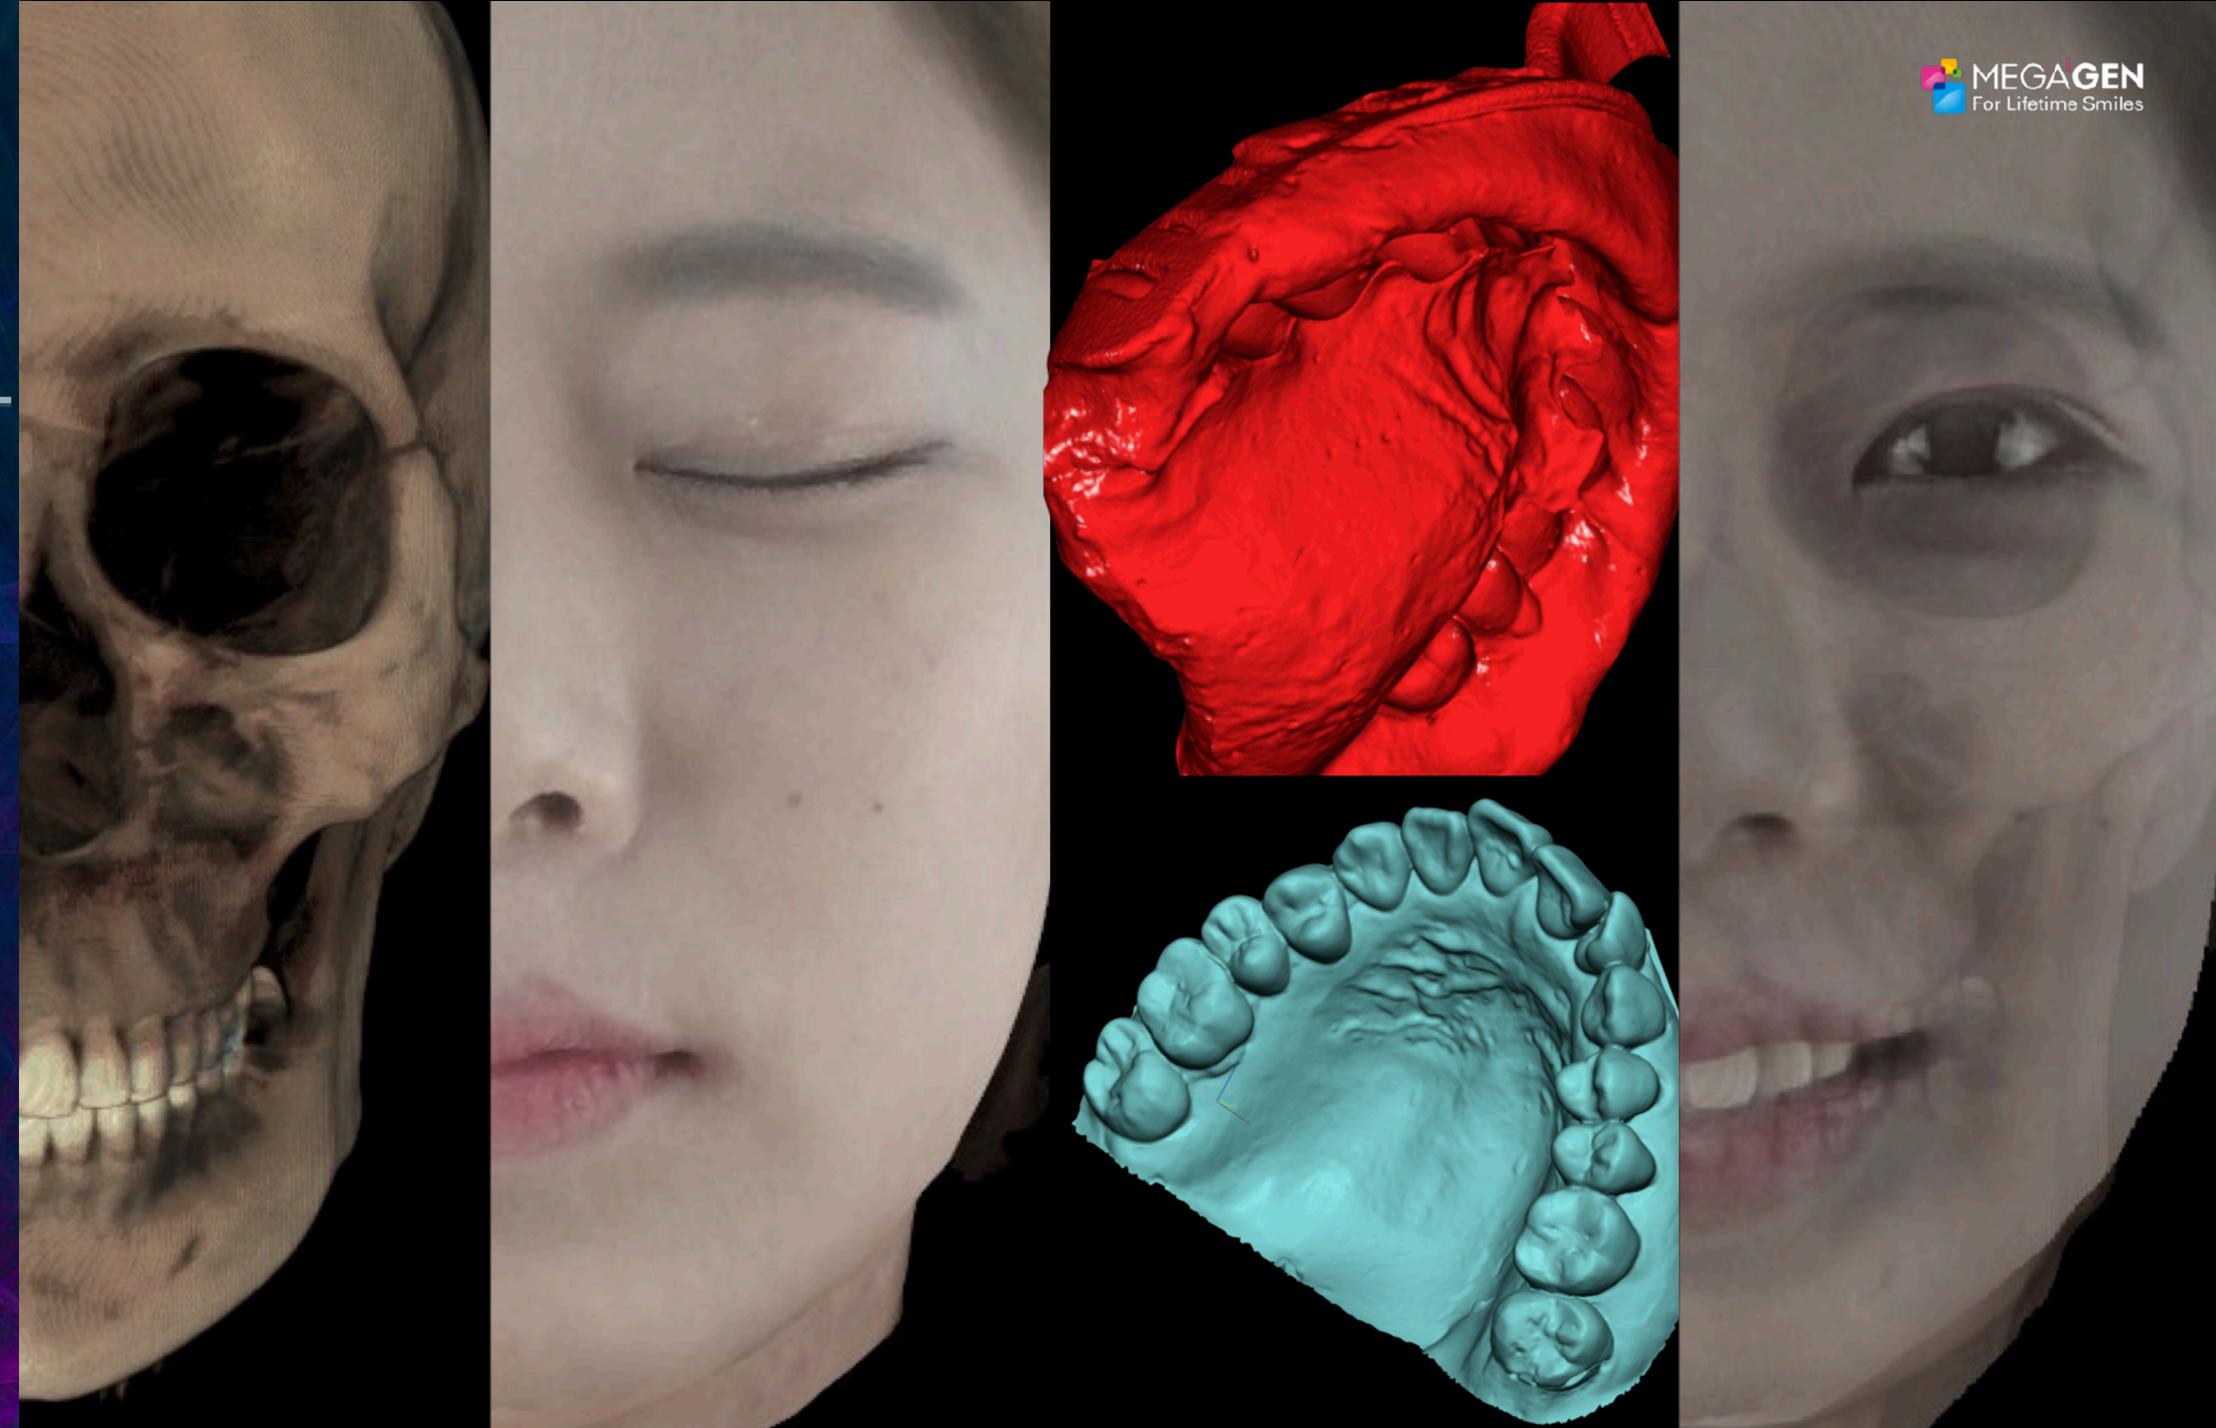

Collect every patient's data for complex full mouth case prosthesis in less than 10 minutes

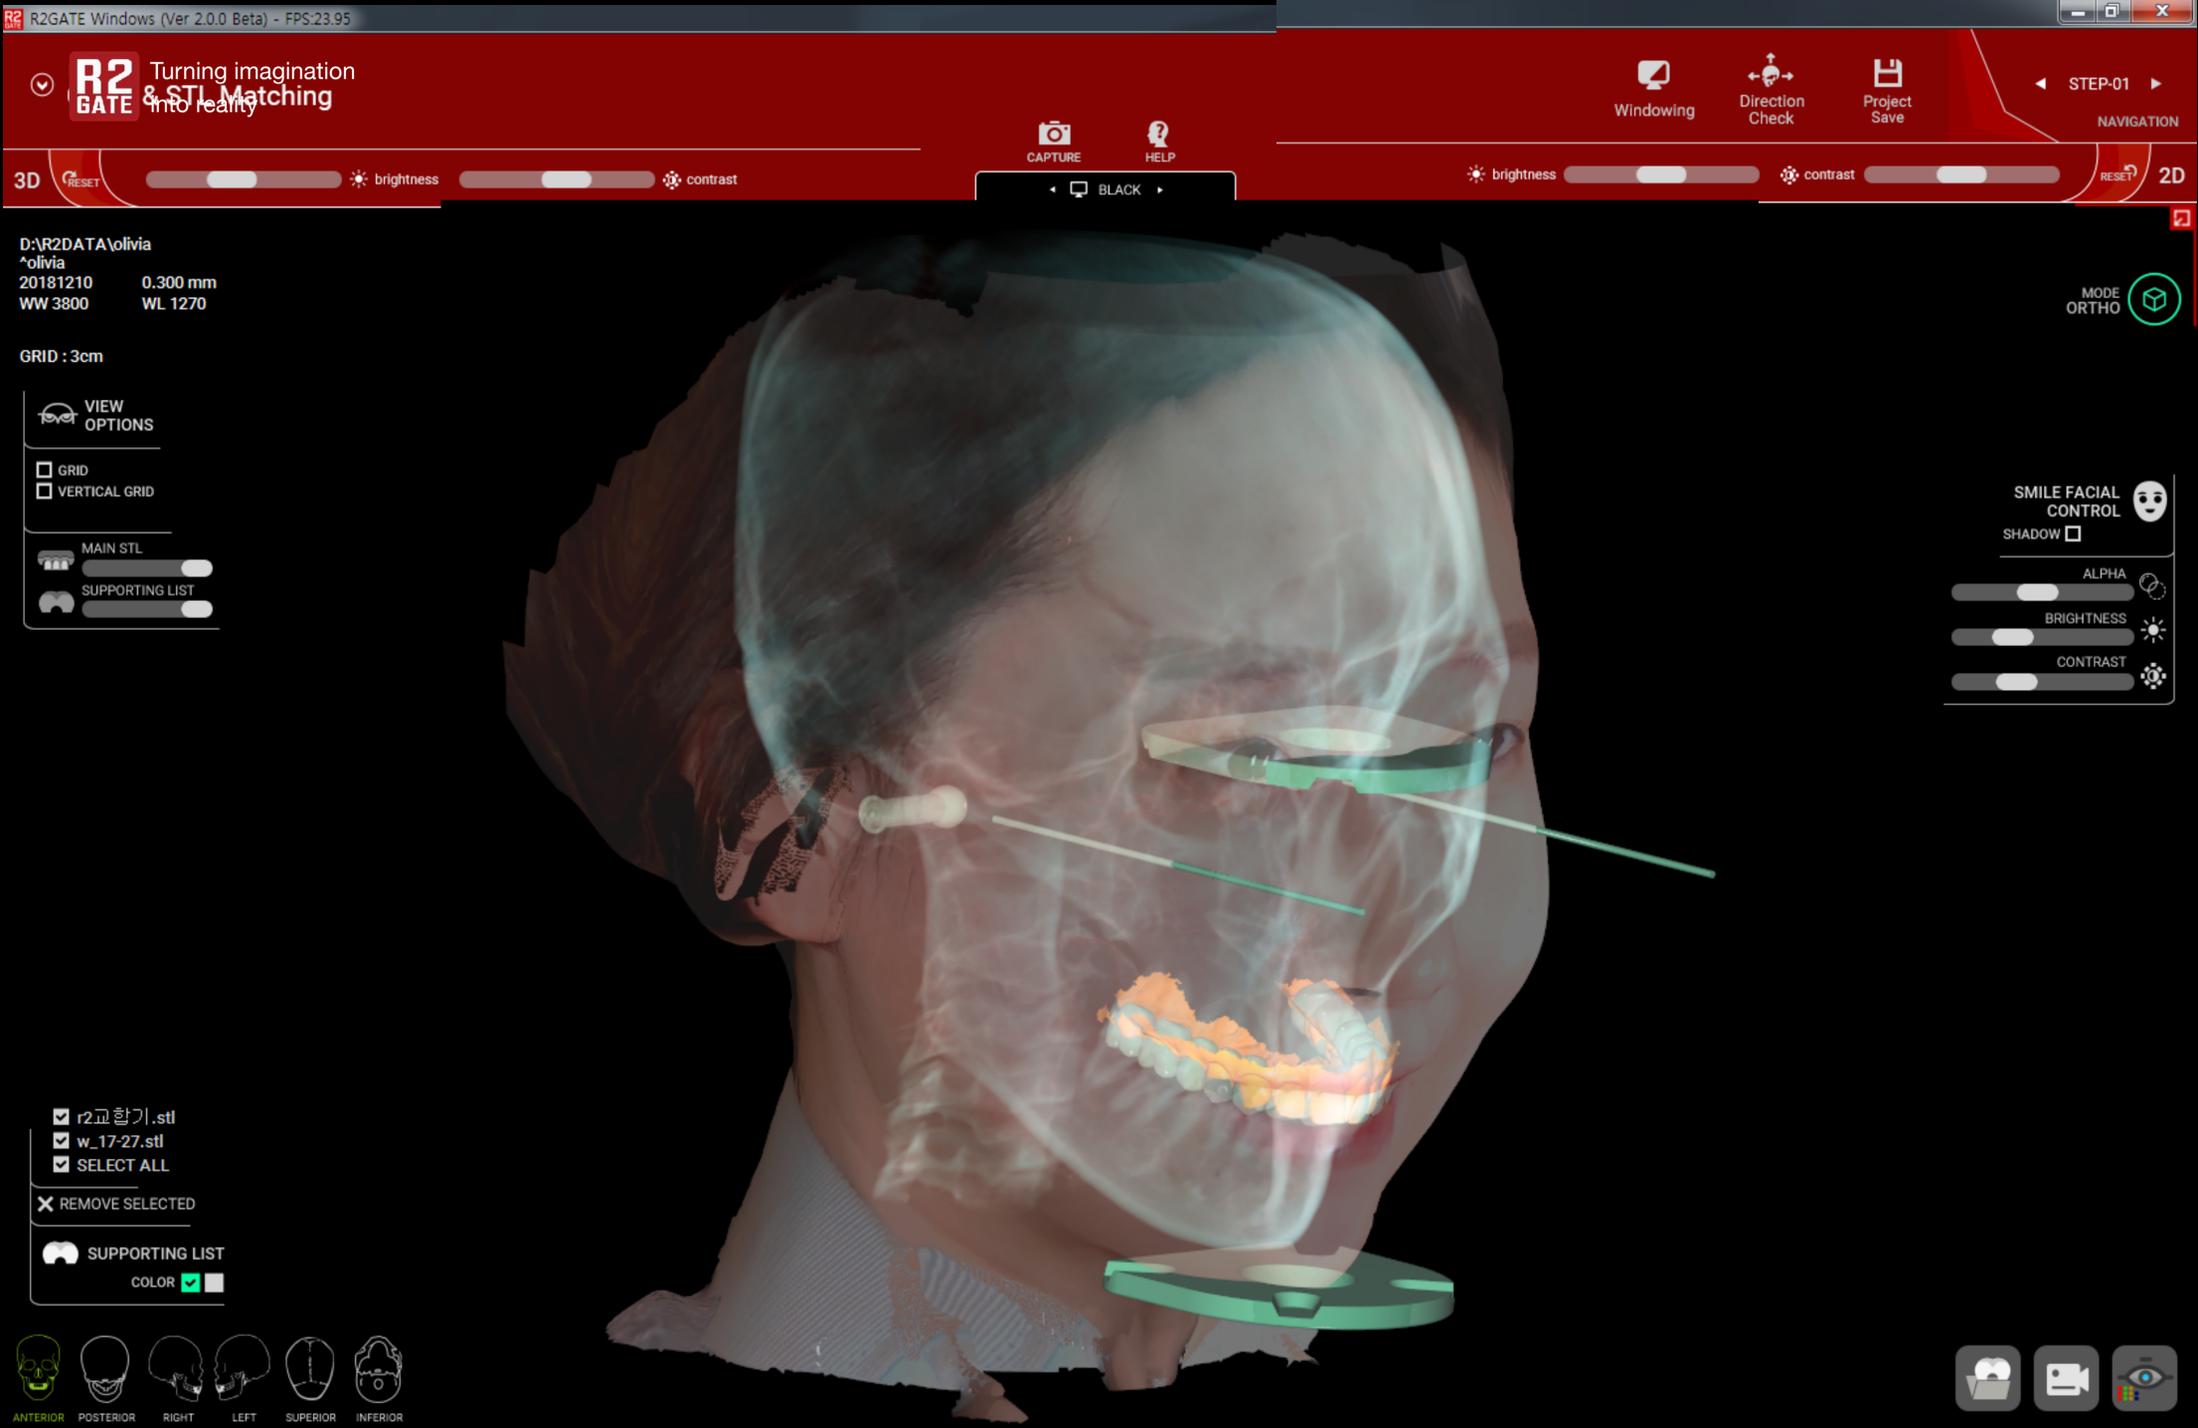

Complete CBCT, Smile, impression scan less than
10 minutes and create the **digital virtual patient**.

Consultation & Treatment planning

Evaluate aesthetics and functional problems using the completed diagnosis data of the patients and make suggestions for alternatives will help facilitate agreement on treatment plans.

*Occlusion relations of R2 STUDIO

R2STUDIO is based on CR(Centric Relations), however, if the you have a different standard, you can implement a custom occlusion relations.

Prosthetic design with aesthetic & occlusion

Based on the Mx.anterior teeth position obtained from the Digital Oral Design, an **ideal esthetics and occlusal virtual wax-up** can be made.

Every information of occlusion including Mockup data and wax-up will be sent to Dental CAD leading to completion of aesthetic and functional prosthesis. Based on the results, **digital guide surgery and full mouth prosthetics** can be performed predictably.
